- o What is artificial intelligence?

- o What can AI do?

- o What is this course?

What is AI?

The science of making machines that:

Rational Decisions

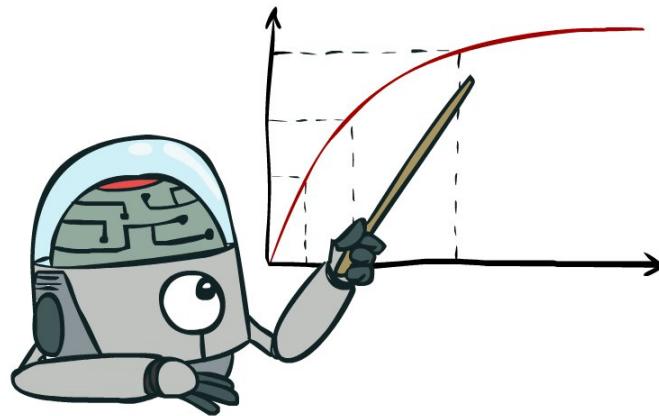

We'll use the term **rational** in a very specific, technical way:

- Rational: maximally achieving pre-defined goals
- Rationality only concerns what decisions are made
(not the thought process behind them)
- Goals are expressed in terms of the **utility** of outcomes
- Being rational means **maximizing your expected utility**

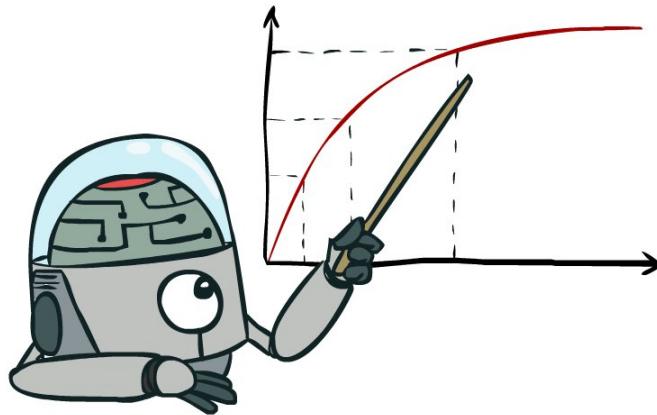

A better title for this course would be:

Computational Rationality

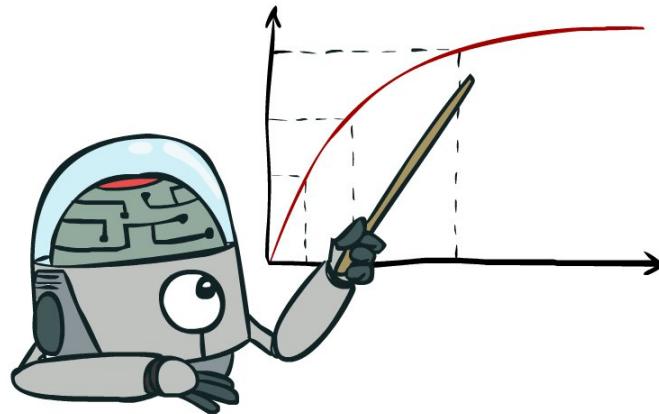

Maximize Your Expected Utility

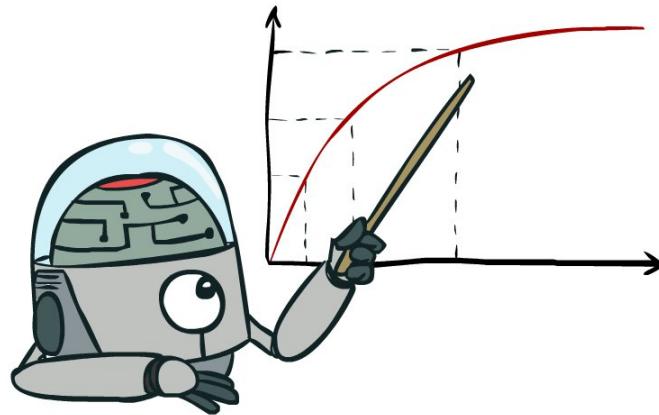

Maximize Your Expected Utility

What About the Brain?

- Brains (human minds) are very good at making rational decisions, but not perfect
- Brains aren't as modular as software, so hard to reverse engineer!
- “Brains are to intelligence as wings are to flight”
- Lessons learned from the brain: memory (data) and simulation (computation) are key to decision making

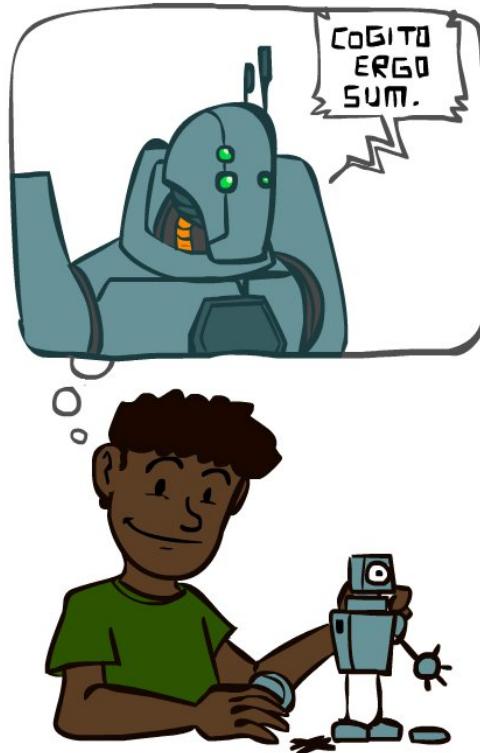

A (Short) History of AI

A (Short) History of AI

- o 1940—1950: Early days
 - o 1943: McCulloch & Pitts: Boolean circuit model of brain
 - o 1950: Turing's "Computing Machinery and Intelligence"
- o 1950—70: Excitement: Look, Ma, no hands!
 - o 1950s: Early AI programs, including Samuel's checkers program, Newell & Simon's Logic Theorist, Gelernter's Geometry Engine
 - o 1956: Dartmouth meeting: "Artificial Intelligence" adopted
 - o 1965: Robinson's complete algorithm for logical reasoning
- o 1970—90: Knowledge-based approaches
 - o 1969—79: Early development of knowledge-based systems
 - o 1980—88: Expert systems industry booms
 - o 1988—93: Expert systems industry busts: "AI Winter"
- o 1990—2012: Statistical approaches + subfield expertise
 - o Resurgence of probability, focus on uncertainty
 - o General increase in technical depth
 - o Agents and learning systems... "AI Spring"?
- o 2012—: Excitement: Look, Ma, no hands!
 - o Big data, big compute, neural networks
 - o Some re-unification of subfields
 - o AI used in many industries

What Can AI Do?

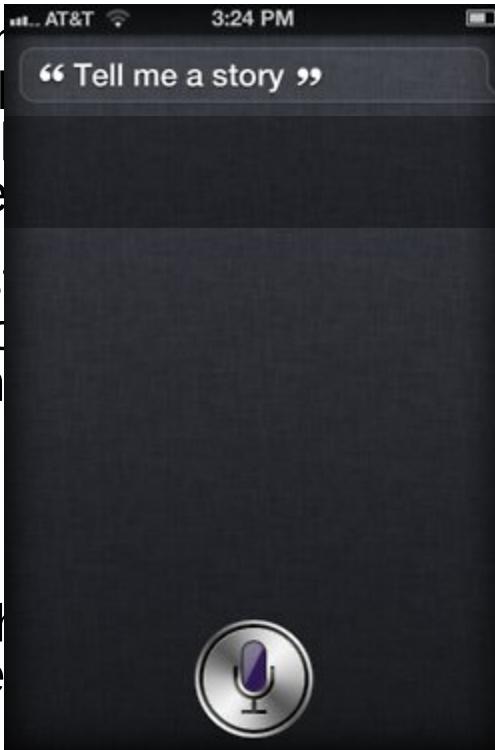

Quiz: Which of the following can be done at present?

- Play a decent game of Jeopardy?
- Win against any human at chess?
- Win against the best humans at Go?
- Play a decent game of tennis?
- Grab a particular cup and put it on a shelf?
- Unload any dishwasher in any home?
- Drive safely along the highway?
- Drive safely along Telegraph Avenue?
- Buy a week's worth of groceries on the web?
- Buy a week's worth of groceries at Berkeley Bowl?
- Discover and prove a new mathematical theorem?
- Perform a surgical operation?
- Translate spoken Chinese into spoken English in real time?
- Write an intentionally funny story?
-
-
-
-

Unintentionally Funny Stories

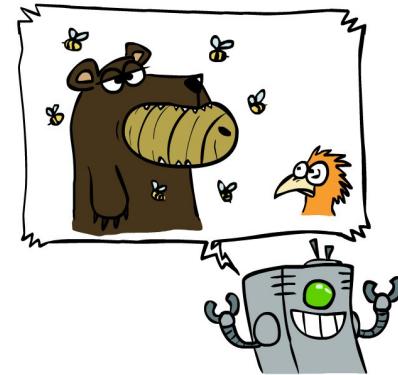

- o One day Joe Bear was having a picnic with Irving Bird where some birds were flying overhead. Joe saw that there was a beehive in the oak tree. He ate the honey and got stung.
- o Henry Squirrel was thirsty and was sitting on the river bank where his good friend Henry was sitting. Henry slipped and fell in the water. The End.
- o Once upon a time there was a crow who was sitting in a tree. He noticed that he was hungry and swallowed the cheese he found in his mouth. The End.

and a vain crow. One day he had a piece of cheese in his mouth. He became hungry, so he flew over to the crow. The End.

Natural Language

- o Speech technologies (e.g. Siri)
 - o Automatic speech recognition (ASR)
 - o Text-to-speech synthesis (TTS)
 - o Dialog systems
- o Language processing technologies
 - o Question answering
 - o Machine translation

"Il est impossible aux journalistes de rentrer dans les régions tibétaines"

Bruno Philip, correspondant du "Monde" en Chine, estime que les journalistes de l'AFP qui ont été expulsés de la province tibétaine du Qinghai "n'étaient pas dans l'ilégalité".

- o Les faits Le dalaï-lama dénonce l'"enfer" imposé au Tibet depuis sa fuite, en 1959
- o Vidéo Anniversaire de la rébellion

"It is impossible for journalists to enter Tibetan areas"

Philip Bruno, correspondent for "World" in China, said that journalists of the AFP who have been deported from the Tibetan province of Qinghai "were not illegal."

- Facts The Dalai Lama denounces the "hell" imposed since he fled Tibet in 1959
Video Anniversary of the Tibetan rebellion: China on guard

Mostly Sunny

Game Agents

- o Classic Moment: May, '97: Deep Blue vs. Kasparov
 - o First match won against world champion
 - o “Intelligent creative” play
 - o 200 million board positions per second
 - o Humans understood 99.9 of Deep Blue's moves
 - o Can do about the same now with a PC cluster
- o 1996: Kasparov Beats Deep Blue
“I could feel --- I could smell --- a new kind of intelligence across the table.”
- o 1997: Deep Blue Beats Kasparov
“Deep Blue hasn't proven anything.”

Game Agents

- o Reinforcement learning

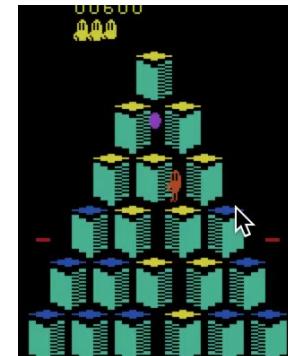

Pong

Enduro

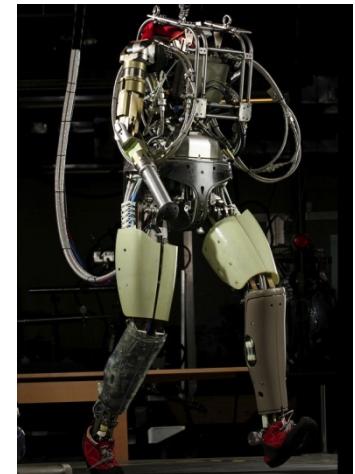

Beamrider

Q*bert

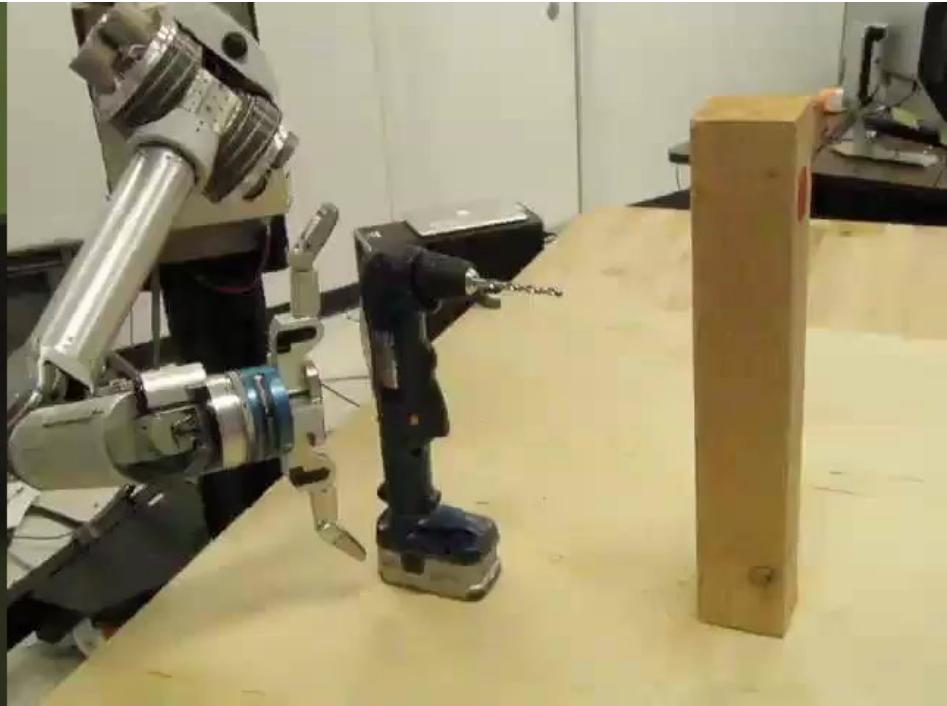

Robotics

- o Robotics
 - o Part mech. eng.
 - o Part AI
 - o Reality much harder than simulations!
- o Technologies
 - o Vehicles
 - o Rescue
 - o Help in the home
 - o Lots of automation...
- o In this class:
 - o We ignore mechanical aspects
 - o Methods for planning
 - o Methods for control

Utility?

Clear utility function

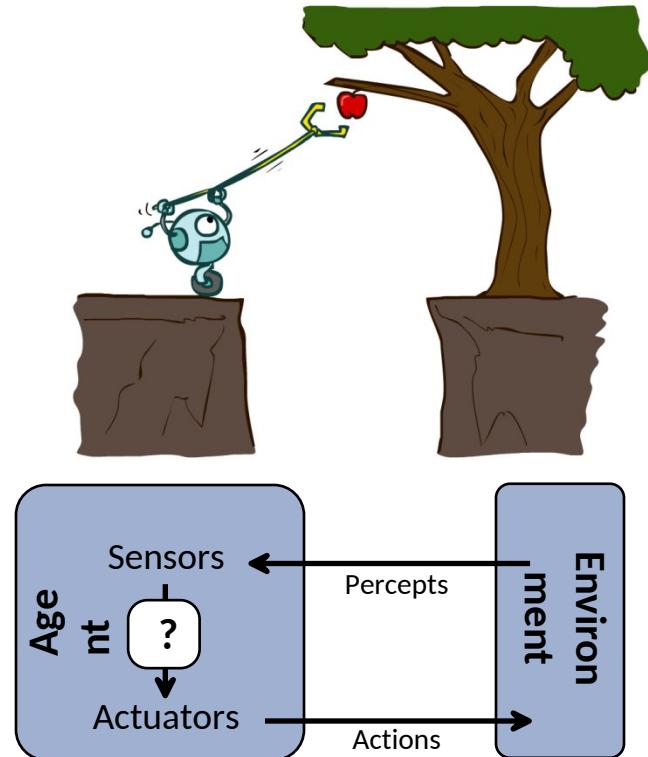

Not so clear utility function

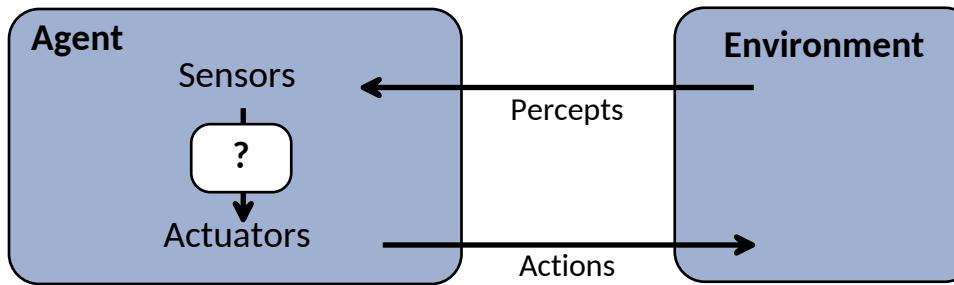

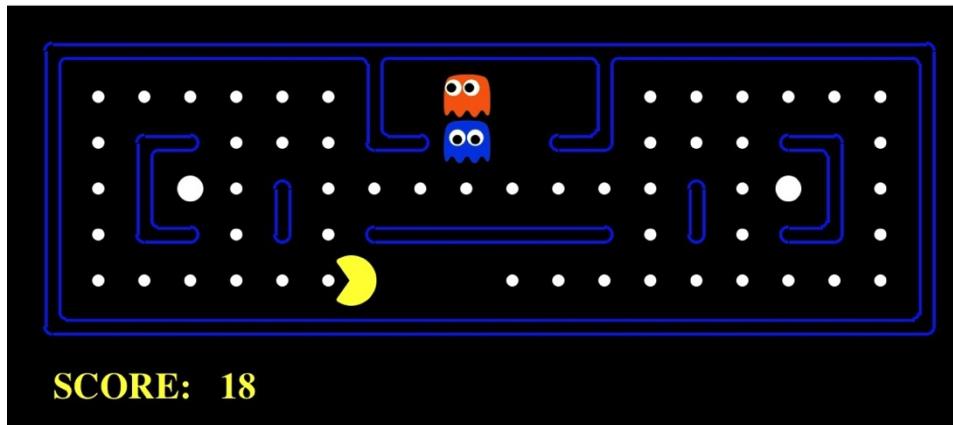

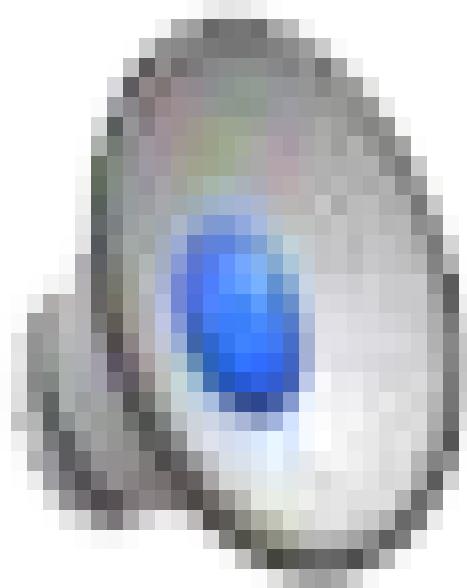

Designing Rational Agents

- o An **agent** is an entity that *perceives* and *acts*.
- o A **rational agent** selects actions that maximize its (expected) **utility**.
- o Characteristics of the **percepts**, **environment**, and **action space** dictate techniques for selecting rational actions
- o **This course is about:**
 - o General AI techniques for a variety of problem types
 - o Learning to recognize when and how a new problem can be solved with an existing technique

Pac-Man as an Agent

Maximize Your Expected Utility
